

Fyffes recently moved into their brand new, 9500m<sup>2</sup>, state of the art production, distribution centre and headquarters in Balbriggan, North Dublin.

This fantastic development was designed by Scott Tallon Walker Architects and Arup, who provided their consultancy services. The design brief comprised two elements. A production facility with the capability for future expansion and a headquarters building designed to amalgamate staff into one location.

Our TB50 SG facade system with integrated concealed frame vents and ST door systems were installed by Alutec Facades Ltd on this Meegan Builders project.

**Main Contractor:**  
Meegan Builders

**System Partner:**  
Alutec Facades
