

Completed in 2018, this wonderful colourful building is the home of the Student Services in TU Dublin Blanchardstown, formerly Blanchardstown IT.

Purcell Construction were the main contractors for this development with Samuel Stevenson & sons as the architects.

APA's TB50 facade and ST70 windows and doors was installed on this project by Window & Roof Lights. Designed to achieve EXEED accreditation the building is not only impressively finished with the colourful facade, it's also highly energy efficient. An excellent project to be involved in.
