

Alexion is a global biopharmaceutical company focused on developing life-changing therapies for people living with rare disorders.

APA Facade Systems manufactured our TB50 SG facade system for phase one and two at the Alexion pharmaceutical development in Blanchardstown, Dublin 15.

Our systems were installed on the main building, phase one, spanning 12,000 m² managed by Stewart Construction and the adjacent bulk drug substance manufacturing facility, phase two, featuring 30 metre high shards.

Main Contractor:

Stewart Construction & Conack Construction

Architect:

PM Group

System Partner:

Duggan Systems

System Used

TB50 SG Facade System

TB50 SG Concealed Frame Vent
