

The Charlemont Exchange building on the banks of the Grand Canal in Dublin 2 comprises of modern grade A level office space. The building is seven floors in height, with highly flexible spaces & large floor to ceiling heights throughout. This building received a LEED Gold certification ensuring an energy efficient and environmentally friendly building.

Mealey Architectural Facades completely transformed the look of this 123,000 sq ft building by installing our TB50 SG facade system and integrated concealed frame vents.

The 5.9m high reception area with a circular rotunda feature exudes quality and leaves a marked impression on occupiers and visitors alike.
