

APA Facade Systems are delighted to have worked alongside West Architectural Facades and Mahony Architects on the new Gaelscoil an Ghoirt Álainn on Murmont Avenue, Montenotte, Co Cork.

Our ST60 Window Systems were installed by West, increasing the natural light within the classrooms and building.

This €5m school building was recently handed over to the Department of Education by Conack Construction. It includes a new two-storey 16-classroom national school building, associated teaching spaces, offices, general purpose hall, special needs units.
