

The refurbishment and extension to 24-26 City Quay in Dublin City was completed in the last quarter of 2020.

This beautiful building was designed by KMD Architecture to achieve a LEED gold-certification by the USGBC.

Working in conjunction with Alutec Facades Ltd, mac-group.com and KMD Architects, we took a trip in to see the finished project last week and it did not disappoint.

Alutec Facades installed APA's TB50 Facade System to this project at the old Irish Life office building.

Congratulations to all involved on this job.
