

Construction work for the Sarsfield Barracks gym in Limerick's Defence Forces is complete. The facility will be used by the Defence Forces for a range of training and recreation purposes, with state-of-the-art equipment installed.

Sarsfield Barracks Gym is located within the curtilage of a historic barracks. It has been designed by Oppermann Architects to fit sensitively into the surroundings, respecting the materials, colour, scale and quality of adjacent protected historic structures was a top priority.

Sustainability is a key element of the sports hall. It features our TB50 curtain wall system and ST70 Hi windows and doors. The hall is flooded with natural light thanks to the floor to ceiling glazing within our curtain wall. West Architectural Facades expertly installed our systems for this development.
