

Ossory House is located at 18 Leeson Street Lower in the heart of Dublin city. This building recently undertook a complete office refurbishment and extension, increasing the overall office space by 449 sq. metres.

Graham Group were appointed as the building contractors for this development.

Windows & Rooflights Ltd. installed our structurally glazed TB50 curtain wall system and our ST80 windows and doors to the rear and side elevations of the building.

McCauley Daye O'Connell Architects' fantastic design of the glass façade alongside the large window dimensions results in a substantial increase in natural light within the offices.
