

APA Facade Systems are proud to see our curtain wall systems and bespoke rooflights feature on one of the most beautiful pieces of architecture in Limerick City – The International Rugby Experience.

This spectacular landmark building features unparalleled, birds-eye views of Limerick City. Taking inspiration from the spires and architecture within Limerick City, Níall McLoughlin Architects designed a seven-storey tower, with a striking red brick facade on every elevation of the building.

APA's curtain wall system and bespoke rugby ball shaped roof lights were fabricated and installed by Alutec Facades Ltd on this nZEB compliant development. They provide a huge amount of natural light to the internal environment of the building.
