

Strawberry Place is a 10-storey student accommodation development near St. James Park in Newcastle city centre by Vita Student. The scheme was carefully designed in relation to Leazes Park Conservation Area to the north and alongside existing and proposed buildings to the south, west and east. The development is focused around a central landscaped courtyard which spills out from a double height student hub space.

The Vita Student building has 331 beds split into 5-bedroom cluster apartments and 271 studios, plus a large student hub.

This project was completed using APA Facade Systems TB50 curtain wall and ST60 window systems, installed by Speedclad Ltd.
