

UCD University Club was developed to provide University staff, corporate clients and the community with a first-class social engagement setting, complemented by the excellent existing conference event facilities of O'Reilly Hall. The extension incorporates private dining areas, lounge areas, fully functional kitchen, toilet block, and small office areas.

The recently completed building overlooking the campus lake and was designed by renowned architects Scott Tallon Walker.

Mealey Architectural Facades installed APA Facade Systems TB50 SG and TB35 HI curtain wall systems from floor to ceiling on the front of this 1,835m<sup>2</sup> building resulting in a substantial increase in natural light on the dining areas, as you can see from the images to the right..
