BI-FOLD DOOR

- Our Bi-Fold door system is known for its versatility. It comes with up to 14 sashes opening internally or externally, with the possibility of an odd or even number of sashes.
- Our Bi-Fold door is available with single and dual colour to match Qualicoat (RAL colours). It also comes anodised to meet any project requirements.
- This system comes with impressive U values and thermal performances, thanks to its thermally efficient polyamide core (24mm to 44mm).
- The excellent design on this system allows you to insert the bottom of the frame into the pavement, leaving the threshold completely hidden.
- The wheels and rollers are also concealed when the door is in the closed position providing a high-quality, aesthetically pleasing finish.
