

Notre Dame's newest program in Ireland is located at the refurbished St Joseph's building at Kylemore Abbey in Galway.

St Joseph's Building was designed as a student facility where students from Notre Dame University US could come to Ireland to foster international connectivity. Located next to Kylemore Lake, particular emphasis was given to preserving and maintaining the sensitive nature of the landscape with the new roof level extension. The green glass plane reflects the natural environment of Kylemore to assimilate the building into its natural landscape and setting.

Window & Roof Lights completed the refurbishment of this historic building using out TB50 SG facade system.
