

Park Rí Destination Stop & Food Court officially opened their doors on the 14th of October 2020.

It is located in the historic town of Kells in Ireland's Ancient East. Rí coming from the Irish word for King suggests that Park Rí offers food and facilities fit for a King.

This development was designed by Paul O' Neill Architects. With sustainability at the forefront of the design, it achieved an A rating in the Building Energy Rating (BER).

Our TB50 facade system and aluminium brise soleil, installed by Ellipsis Aluminium helped Park Rí to achieve this excellent energy rating.
