ST4-600 LIFT & SLIDE

- Our ST4-600 Lift & Slide door exhibits the best thermal insulation in all the sliding range.
- It comes with up to six sashes and the possibility of large sash dimensions up to 3000mm x 3000mm, making the ST4-600 the ideal solution to enclose large spaces while maintaining a high level of luminosity.
- The ST4-600 is available as a manual and automated door system.
- The lift and slide mechanism allows the door to be lifted for an ultra-smooth gliding motion and lowered for excellent weather seals and air leakage reductions.
- It comes with single and dual colour options to match Qualicoat (RAL colours) and is also available with anodised finish.
