

60- 74 Gansevoort in the historic meatpacking district of New York has been beautifully preserved and transformed by BSKS Architects.

BSKS kept the historic style of the meatpacking district, while adding a luxurious modern twist.

Chosen for the durability, flexibility and acoustic values, 60 – 74 Gansevoort features our eco-friendly ST70 HI Windows. Fixed sashes, curved sashes and tilt & turn windows were all installed on this project.

Complete with all window jewellery, this floor to ceiling window system is the perfect solution to ventilate the building while increasing natural light.

Our systems partners Diversified Glass and Storefronts did a fantastic installation job.

Over the past 20 years, the Meatpacking District in New York has been transformed into one of the most vibrant, upmarket destinations in the city.

Gansevoort Row is situated near the High Line – a 1.45-mile-long elevated linear park, greenway and rail trail created on a former New York Central Railroad.
