Juliet Balcony

Design

The Juliet Balcony system features a clear heat-strengthened glass panel providing uninterrupted views and high fall protection for floor-to-ceiling windows and door systems.

This innovative system is perfectly suited for multi-level residential developments and student accommodations.

Technical Information

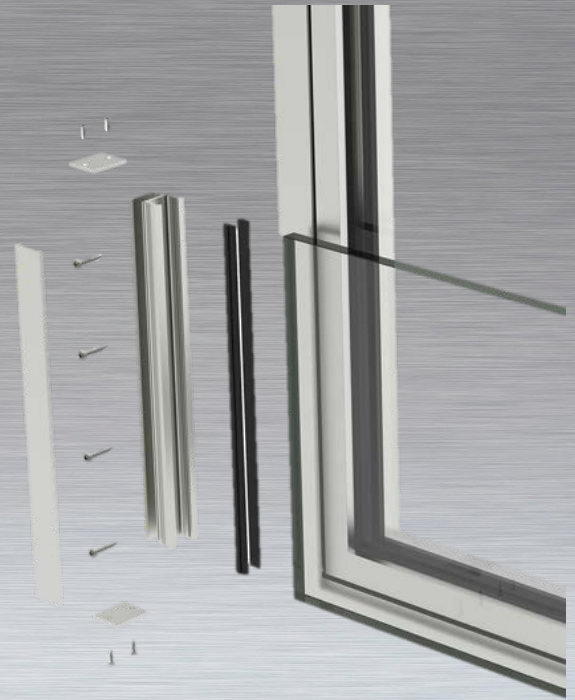

- Easily integrated with any of our ST window systems, tilt & turn door, French doors and ST4-600 Lift & Slide.
- Maximum width 1800mm
- Available in single, dual-colour or anodized finish.
- Qualicoat powder coating.
- Multiple glazing opportunities.

Easy Integration With Our Window & Door Systems

Our Juliet Balcony is designed to be installed with our high-performance Tilt & Turn window/door systems, our Life Enhancing Window, French doors and ST4-600 sliding door systems. It is perfectly suited for multi-level residential developments.

Available with multiple glazing possibilities, the use of heat strengthened, laminated glass is strongly recommended.
