

APA Facade Systems were delighted to see our window and door systems installed on the newly refurbished Virgin Media Ireland studios in Ballymount industrial Estate.

Johnston Windows installed our TB50 curtain wall and ST70 Hi windows and doors on this project.

Our ST70 Hi windows and doors were chosen for this project as it required a thermally enhanced, high performance window system, to reduce heat loss and create a barrier to cold weather.

Originally built in 1998, the former TV3 studios have recently been completely refurbished by Vincent Doyle of Rosanna Construction.

Main Contractor:
Rosanna Construction
