

Axis Group and Primary Health Properties PLC (PHP) have invested €12.6m in developing a 50,000 sq. ft Primary Care Centre in Enniscorthy.

The purpose-built Enniscorthy Primary Care Centre comprises a three-storey primary care centre including; Mill Park Medical Centre, a pharmacy, and an ancillary medical unit. It is the new home for the Health Service Executive and Tusla Child and Family Agency.

The new centre, designed by Limerick City architectural firm, Quinn Architects, has been built with sustainability at the forefront of design. It meets all the requirements of Near Zero Energy Building (nZEB).

Our eco-friendly TB50 facade system and thermally enhanced ST70 Hi windows with matching rebated doors were chosen for Enniscorthy Primary Care Centre to meet the sustainability requirements of nZEB.
