

The brand-new state-of-the-art Naas Community College in Co. Kildare was handed over to the Kildare Wicklow Education Training Board in February 2022. The new school officially opened its doors to students on the 2nd of March.

This new 10,500 m² building will accommodate 1000 students across 37 general purpose classrooms, six science labs, two woodwork rooms, two engineering rooms, two art rooms, a mediation room, a physical education hall, library and ancillary rooms. Our thermally-enhanced, high-performing ST70 HI windows and doors were installed alongside our TB50 curtain wall system on every elevation of this huge Naas Community College campus.

The school is naturally ventilated, with both high and low-level windows encouraging fresh air to circulate and flow through the building. Our TB50 curtain wall system was also installed in numerous locations around the huge Naas Community College campus.
