

The four-star Samuel Hotel in the in Dublin's docklands opened its doors to its first customers in April 22.

PJ Hegarty's were appointed as the building contractor for this project with Henry J Lyons tasked with the beautiful design.

Our slimline ST70 Concealed Sash was specifically chosen to fit in with the modern architectural design of Spencer Place. Its minimalistic aluminium design maximises light within each of the 200 + bedrooms.

Our capped and structurally glazed TB50 facade systems were installed on the ground floor and penthouse areas of this new hotel.

The installation of our windows and facade systems was completed by Zeon Design.
